The Affordable Care Act: Tobacco Cessation Coverage

Tobacco Cessation as a Preventive Service
The Affordable Care (ACA) requires non-grandfathered health insurance plans to cover preventive services that have received an "A" or "B" grade recommendation from the U.S. Preventive Services Task Force (USPSTF). ACA also requires these services be provided with no cost-sharing for the member, which means no copays, coinsurance or deductibles when using an in-network provider.

The USPSTF, an independent, volunteer panel of experts in prevention and evidence-based medicine, has given tobacco cessation interventions for adults an "A" grade.

BCBSIL tobacco cessation interventions now include cessation medications
As of Sept. 1, 2014, in addition to the currently covered tobacco cessation counseling and screening for members who use tobacco products, BCBSIL covers two 90-day treatments for tobacco cessation medications per benefit period with no cost-share. This coverage includes a variety of FDA–approved tobacco cessation drugs (including both prescription and over-the-counter) when prescribed by a health care provider.

Tobacco cessation medications covered
BCBSIL coverage without cost-sharing for non-grandfathered plans includes:
